

## University Hills Main Connector Streets Will Be Slurried July 16-19

Dear UHills Resident,

The street slurry project is drawing to a close, **but with one final push next week.**

On **Monday, July 16**, crews will begin work on the main connector streets within the community. Specifically, **Los Trancos Drive, Vista Bonita Drive, Owen Court, Gabrielino Drive and California Avenue** will receive a slurry coat. The work is scheduled to be completed on **Thursday, July 19.**

The streets indicated will be partially closed and split into halves to allow for vehicular access in and out of the community. Crews will be present to guide traffic and work on the streets, so we ask that you take extra precautions when driving and allow additional time to get to and from your destination during the week. You will always be able to get to and from your home, but you may have to take an alternate route while an area is under repair.

The road striping and stencil work will begin approximately 10 days after the street slurry in order to allow the road to completely cure.

*Please use caution while driving inside the community and observe all street signs and speed limits as posted.*

***Thank you for your patience and support during this project.***
